

Recommendation letter

The EDF Foundation which has been taking part in an International solidarity program since 2013 is a partner of Children Of The Mekong.

The values of this charity and its impact on the children caught our attention and we decided in April 2015 to support them with a first project in Thailand.

As a result, in Poblaki, at the border with Burma, our intervention allowed children in kindergarten and primary school, as well as villagers to get access to water with the implementation of a solar photovoltaic pumping system.

We deeply appreciate Children Of The Mekong's rigour, which they have been demonstrating for many years in the Karen villages of Thailand.

This first project having increased our interest, we are working with Children Of The Mekong on a second program in Cambodia. Its objective is to renovate the electrical system of the Sisophon education centre in order to bring comfort and security to the 600 children coming every day.

The quality of this partnership is remarkable and I remain available to existing and potential partners to give my testimony.

Paris, September 19th 2016,

Bernard MALHERBE
Responsable des Opérations
